

MAVES INTERNATIONAL SOFTWARE

VIEWPOINT LOGISTICS™

COLD CHAIN SOLUTIONS

Over 40 years ago, our first client was a PRW. We understand your daily challenges can include: locating client's products in the variable temperature controlled environments; management of code dated products; provision of flawless detailed product activity records; retain & make available to any authorized stakeholder any data supporting the movement of goods through your company's position in the Cold Chain.

Let ViewPoint Logistics™ "put the freeze" on your challenges!

With built-in DocSign and DocStore functions, MAVES eDocs is more than just a Graphical Forms tool! Saving you time and delivering both your internal operators and your client's operational necessary information at a click or two!

DOCSIGN

Eliminates manual copying, scanning & emailing of signed Bills of Ladings to your customers.

DOCSTORE

- Eliminates manual copying & filing of external documents ex. BoL, Photos, HACCP checklists.
- Supports multiple file types.
- Related documents can be viewed online and can be available to your customers via MyLogistics™ web portal.

DATE CODE TRACKING AND CONTROL

ViewPoint Logistics™ helps you rapidly identify Recall Products in your facilities and apply appropriate restrictions to prevent shipment.

This ensures as a PRW, you can provide critical transaction and disposition data on Recall products in a timely manner to safeguard the use/consumption of goods from the supply chain.

DATE CODES & CONVERSION METHODS

MAVES' ViewPoint Logistics™ software enables 3PL users to easily define "Date Code Conversion Methods" that are used by the system to automatically derive the Date associated with the goods. This increases inventory accuracy and minimizes labour costs.

EXPIRY DATES & SHELF LIFE RULES

- User-defined Consignee Shelf Life Rules allow 3PLs to configure scenarios based on the number of Days remaining before Expiry, or, a Percentage of time remaining before Expiry.
- Our system applies these rules so that only the RIGHT stock is reserved, picked and shipped to your Clients' Customer.

HOLD SURCHARGES (EX. EXPIRED STOCK)

MAVES' powerful inventory and billing engines allow for the definition and attachment of a Hold (against Expired stock) which instructs the system to apply a "Surcharge" during a normal billing event (Generation of a Recurring Storage Invoice). In addition to recovering Revenue from such a surcharge, this feature also acts as an "incentive" to Clients to expedite the disposal of such goods.
