

MAVES INTERNATIONAL SOFTWARE

VIEWPOINT LOGISTICS™

MYLOGISTICS™

Clients need a steady flow of quick, accurate and up-to-date information in order to streamline their inventory planning and order processes.

MyLogistics™ meets that challenge. It extends the power of ViewPoint Logistics™ to the 3PL client so they can review stock levels, track inbound and outbound orders and generate reports based upon this information. With our client portal, not only do they see all their data over the web, they can use the same ViewPoint Logistics™ analytic tools (Highviews) to optimize inventories, reduce costs and satisfy their own customer service objectives.
