Lot Sets

Sindhuja Badri

Monday April 15, 2024 from 10:00 – 10:30

AGENDA

- Introduction
- Overview
- Topics:
 - > Components
 - > Sets
 - > Other
- Conclusion
- Question and Answers

Introduction

- Lot Control /Rotation is a “critical” service provided by 3PLs to Clients
- VL has a number of capabilities to assist you with this important task
- Like many things, you may be unaware of capabilities that will provides increased efficiency and accuracy.

Overview

- ◉ Can you define Lots for your specific Client/Product requirements?
- ◉ What Data can be created for Lots?
- ◉ How may the Data be populated?
- ◉ Can they be changed later?
- ◉ What Reports/Queries exist to view them?

Components

- System vs. User Defined
- Data Types
- Allowed Values

The screenshot shows the "TL WP.44 Lotting Data Sets -- Unlimited Logistics" application window. The title bar includes standard Windows controls and the date "04.10.2024". The menu bar has "File" and "Help".

The main area is divided into sections:

- A header section with labels: "01*Lot Data Set", "02*Stock Rotation Seq. ID", and "03*Description".
- Below these are three input fields: "SAMPLE", "SG", and "STOCK ROTATION GROUP". A yellow arrow labeled "1" points from the right towards the "SG" field.
- To the right of these fields is a label: "BATCH / JULIAN / EXPIR".

A table below contains two columns: "Component ID" and "Hierarchy". Above each column is a search icon.

Component ID	Hierarchy
JULCOD	03
BATCH	02
LED	01

At the bottom, there is a row of buttons: OK, Cancel, Delete, Review, Print, Exit, and Help. A large yellow arrow labeled "2" points down at the "Exit" button.

A legend at the very bottom explains function key shortcuts:

- F2 = Clear F4 = Exit B = Billing Group DEL = Delete
- F3 = Jump A = Lot Data Set C = Reporting Group REV = Review
