Cloud or On-Premise Solution

In an increasingly digital world, businesses are expected to adapt quickly to new demands and challenges. The 3PL industry is no exception. In fact, your success depends on your ability to respond to market shifts with agility and efficiency.

That's where the cloud comes in. With ViewPoint Logistics™, our cloud-based solutions ensure your warehousing operations are always running at peak performance—anytime, anywhere. By leveraging the power of the cloud, you can reduce IT overhead, minimize downtime, and access your critical data in real time. Whether you're tracking inventory, managing billing, or overseeing shipments, ViewPoint Logistics™ gives you the flexibility and reliability to scale as your business grows, without the heavy investment in physical infrastructure.

For businesses seeking total control over their infrastructure, ViewPoint Logistics™' On-Premise Solution delivers robust performance with full customization. Ideal for organizations with specific security, compliance, or operational needs, this solution offers high-level control over your IT environment.

Cloud Solution

- **Real-Time Data Access:** Manage your warehouse operations from any location with immediate access to inventory, order statuses, and shipment tracking. The cloud allows you to make fast, informed decisions, no matter where you are.
- **Scalability on Demand:** Whether your business is experiencing growth or seasonal fluctuations, ViewPoint Logistics™ scales with you. You can easily add new users, expand functionality, or support multiple locations without investing in expensive hardware or infrastructure.
- **Enhanced Security:** ViewPoint Logistics™ is hosted in a highly secure cloud environment, your data is protected from unauthorized access, breaches, or loss. Our cloud infrastructure offers data encryption, regular backups, and stringent compliance as per industry standards.
- **Automatic Updates and Maintenance:** Say goodbye to downtime for system upgrades or maintenance. ViewPoint Logistics™' cloud platform ensures that you always have the latest features and improvements automatically, with no need to interrupt your operations.
- **Reduced IT Overhead:** By operating in the cloud, you eliminate the need for physical servers, on-site IT management, or costly hardware upgrades. Reduce your overall IT expenses and frees up resources to focus on your core business.
- **Disaster Recovery & Global Accessibility**

On-Premise Solution

- **Complete Control & Customization:** Tailor the system to your exact workflows and integrate with existing software.
- **Enhanced Security:** Keep all data in-house with full control over encryption, access, and compliance measures.
- **Independence from Providers:** Manage servers, updates, and infrastructure without relying on third-party cloud services.
- **Optimized Performance:** Configure hardware and resources to suit your unique operational demands.
- **Seamless Integration**: Sync ViewPoint Logistics™ with your current systems for a cohesive IT environment.
- **Internal Maintenance:** Your IT team controls updates and system performance, reducing downtime.
- **Cost Efficiency**: One-time hardware investments, with no ongoing cloud fees.
- **Disaster Recovery:** In-house recovery ensures your data is backed up and restored quickly in case of disruption.
- For businesses preferring **self-managed infrastructure,** our On-Premise Solution provides security, flexibility, and reliability.
